

Mobile Fiber Belt Model MFB06

Foldable with semi or fully automatic system

Do you have a need for synthetic or metal fibers in your mix?

Dosmec MFB06 mobile conveyor system forms the link between the fiber dispenser at ground level and a higher discharge point. It can be positioned permanently or moved from place to place. Sized to meet the needs of concrete trucks, it conveys the fiber to where it is needed.

Technical Specifications

- Belt Chevron type : 0.45 x 6 mt. (18" x 20 ft)
